## Quality

At NCD our doors are produced by a leading edge innovative manufacturing process that places our doors at the forefront in quality compared to the highest quality doors available through out the World. Our patented technology used in the manufacturing process enables maximum precision and flexibility unparalleled by any other door. This process also allows NCD to offer the market one of the most highly sophisticated and solid constructed doors available. Quality, sophistication and flexibility is what you can expect from NCD.

## Elegance

The combination of innovative technology, a wide range of beautiful door designs and materials, and compliance with the most stringent international quality standards has made NCD a proven leader in the door industry. We hope you are impressed from what you see in this brochure. There is so much more to see and learn about NCD. We encourage you to contact NCD and find out about all the possibilities.

## Security

As important is beauty and flexibility to the enjoyment of our doors, advanced and proven security features are just important to NCD and the safety of its customers. All our doors incorporate the Mul-T-Lock® lockset mechanism. All of our doors undergo stringent testing procedures and surpass international standards for durability and protection from attempted break-ins.

## Custom Designs

Not only can NCD customize the size of our doors to meet your unique and larger than usual opening sizes, but we have many other options as well as they say "variety is the spice of life". Imagine being able to change the total look of your door down the road, and we are not talking about a new paint job. Our doors are too beautiful to cover up with paint. We are talking about the ability to change the skin coverings of the doors whether it be a wood, aluminum or even glass. This feature allows the customer to totally change the look of the doors without changing the core of the door; thus stretching the initial investment and offering more flexibility. NCD offers many skins in moisture-resistant and highly durable materials in numerous attractive colors and designs.
